

Blue Stream Part of Grand Mosque Landscape Beautification

The Sheikh Zayed Grand Mosque is known to be one of the world's largest mosques. Adorned with 82 beautiful domes and 24 carat gold gilded chandeliers, it is known to accommodate up to 41,000 worshippers at once.

The architecture of the sight is spectacular with white marble walls, painted columns, and unique vitrals.

The scale of landscaping around the mosque is breath taking with reflective pools that illuminate both the white and gold colors shining in the sun as well as the phases of the moon at night. Hundreds of tourists flock to see and experience this magnificent structure every year.

Blue Stream Environmental Technology LLC has worked with Sheikh Zayed Grand

Mosque authorities for the development of urban landscaping of this grand spectacle.

Urban Design Projects

Blue Stream is the leading designer and manufacturer of street furniture and urban décor receptacles in the Middle East and South Asia. According to Managing Director, Mr. Suvarna Jeetendra, contemporary street spaces can be linked together to define and enrich community living. Thus reflecting the regions personality of embracing modern architecture with traditional influences.

"Most of our designs are project specific and we work meticulously with clients to conceptualize and develop a customized range of urban décor products for their projects. The final product material and structure is designed very much in

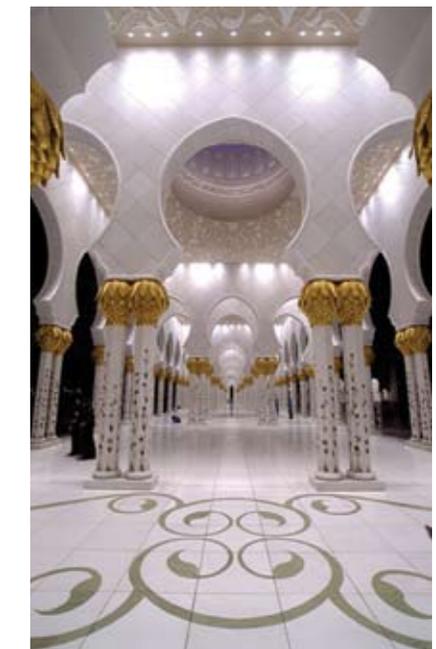

conjunction to the layout of the street or area guaranteeing a perfect blend. The wide range of products offers each customer the exact kind of product that would match the ethos of their projects," he explained.

Landscape Features

The scope of works included complete urban furniture design, fabrication, supply and installation of street furniture items. Blue Stream has collaborated with the client closely to aesthetically design many elements that match the general layout of the mosque, focusing on bringing out the majestic and also serene and peaceful surroundings of the ambient environment.

"The main focus was upgrading the existing urban furnishings around the mosque. They wanted to give the street scape a new feel and breathe new life into the environment considering the popularity the mosque was currently enjoying stood at 300 visitors a day. It is fast becoming one of the most visited monument sites in the UAE as well as a regular landmark in every tourist's

finish involved lustrous polishing which corresponded with the existing rudiments of the mosque. Furthermore the designs chosen also were architecturally similar or related to the design elements of the mosque.

There was a clear understanding between Blue Stream and the Grand Mosque management that the prestige and level of this project would be of one of the highest caliber in the world.

“Great lengths were taken to ensure that the final end product was not only extremely durable and of high quality but also had a fantastic finish and feel to it. The product was made from botticini marble and polished with a glossy finish as required. Also, the product has been offered with a strong warranty specification and provided with a special protective coating to ensure durability for the harsh conditions.

Impressive Results

Being extremely pleased with the design and the overall effect on the urban landscape, the Sheikh Zayed Grand Mosque are looking to collaborate further with Blue Stream in enhancing their public spaces and developing an actual vibrant feel to the external areas of the Grand Mosque project.

Blue Stream has worked with such iconic projects even in the past and continues to do so throughout the GCC and South Asia region. Close understanding of clients and their requirements especially on such well-reputed projects is a must and Blue Stream has successfully shown that it can collaborate on the highest level in terms of design, development, manufacturing, supply and eventual implementation of street design projects.

The Sheikh Zayed Grand Mosque is another feather on the cap, which shows that Blue Stream has the capacity to work with all kinds of world-class projects to deliver truly breath taking public space designs.

itinerary.” This had a lot to do with the management’s decision to upgrade the streetscapes and its capacity to contain all the visitors. Blue Stream worked very closely with the management with offering them renderings of their existing public space and how it would look along with the new street furniture layout.

Extensive Product Range

“The idea was to take actual images of the site and superimpose the suggested street furniture on to those images to give the client an actual idea of how the urban landscape would look when the new street furniture is brought in.

“There was a lot of collaborative work to finalize the finishing and the aesthetics of the street furniture so that the ambiance and the overall appeal of the mosque are mirrored in the implementation of the new street furniture.”

Project Specific

The primary focus was seating arrangement designs and coordinated litterbins. As can be seen from the design a large part of the external
